

YOUR TRIFECTA FOR SPRING SUCCESSES

PREDICTABLE RESULTS SEASON-LONG NUTRITION PREEMERGENT WEED AND INSECT CONTROL

1

Start your preseason training using weather and trends at your geographic location to predict your consistent dependable fertilizer release, using PolyGraph®. Once you're fertilizer has passed the PolyGraph® test, we guarantee your season-long results.

2

Tee off your season with one application of season-long nutrition provided by POLYON® controlled-release fertilizer. Your custom-blended profertilizer is tailor made for your climate ensuring nutrients release when the turf needs them. Better for the environment and one application means time savings for you. What will you do with all your free time?

3

Power-up your POLYON® application by adding your pre-emergent. That's right. One application of fertilizer AND weed control AND insect control. What could be better than that? With our CustoMix® technology, each powerful POLYON® prill is coated with the preemergent of your choice. We have all the best control solutions in the market including top-selling Ronstar, Acelepryn, Dimension and Barricade. You pick the AI percentage and we'll dial up your Powered Up POLYON® custom blend.
