

Bio-MAX® 4-0-0 & EarthMAX®

The Unbeatable Combination for Stress Tolerance and Root Growth

Bio-MAX® 4-0-0

Harrell's Bio-MAX® 4-0-0 is packed with the most complete combination of biostimulants, amino acids, and micronutrients for root development, stress tolerance, and optimal color. Apply 4-8 oz/1,000 sf per month.

Features:

- 52% cold-processed seaplant extract (*Ascophyllum nodosum*) and 5% fulvic acid
- High levels of cytokinins
- 17 natural plant-based amino acids

Benefits of High-Cytokinin Seaplant Extract:

- Increases physiological fitness
- Increases photosynthetic capacity
- Increases chlorophyll
- Increases anti-oxidants
- Increases cell wall strength
- Increases salinity tolerance
- Increases disease resistance
- Increases stress tolerance
- Increases root mass
- Promotes recovery from winter damage, aerification, and pesticide injury

EarthMAX® Liquid Organic

EarthMAX® is an all-natural, organic soil supplement, high in biologically active carbon, humic and fulvic acids, and beneficial biology. EarthMAX® increases beneficial microbiology, improves soil structure, and increases root mass and plant health. Apply 4-8 oz/1,000 sf per month.

Features:

- 100% Organic to USDA standards
- Humic and fulvic acids
- Provides all 16 essential elements required for optimal plant health
- Mycorrhizae and Saprotrophic Fungi
- Photosynthetic bacteria, including *Bacillus subtilis*
- High carbon content

Benefits of Biologically Active Carbon:

- Provides balance to your soil structure and restores fertile soil conditions
- Chelates nutrients and improves CEC
- Provides diverse biological populations that colonize root systems and improve nutrient uptake
- Provides long term food source for soil biology
- Increases root mass and stress tolerance
- Promotes recovery from winter damage, aerification, and pesticide injury
