

# IronMn Mg

**Harrell'sMAX**  
LIQUID FOLIAR NUTRITIONALS

## Introducing IronMn Mg

*Newest Product Innovation in the Harrell'sMAX® Product Line*

### PRODUCT INFORMATION

Harrell's MAX® IronMn Mg is a liquid fertilizer that contains an economical combination of a plant available chelated form of iron, manganese, and magnesium to help promote dark green color in plants.

### PRODUCT OVERVIEW

- Formulated for maximum foliar absorption of micronutrient components

### RECOMMENDED RATES

**Turf:** Apply 3-6 oz. per 1,000 sq. ft. every 7-21 days or as needed.

For severe deficiencies apply 6-12 oz. per 1,000 sq. ft., as needed.

**Trees and Ornamentals:** Apply 2 quarts per 50 gallons of water every 30 days or apply split applications of 2 pints per 100 gallons of water weekly, as needed. To prevent toxicity, limit IronMn Mg to 2 or 3 applications. Always test fertility levels before making applications of minors.

### GUARANTEED ANALYSIS

|                          |       |
|--------------------------|-------|
| Magnesium (Mg) .....     | 1.00% |
| 1.0% Chelated Magnesium  |       |
| Iron (Fe) .....          | 3.00% |
| 3.00% Chelated Iron      |       |
| Manganese (Mn) .....     | 4.00% |
| 4.00% Chelated Manganese |       |
| Sulfur (S) .....         | 5.75% |
| 5.75% Sulfur             |       |

**Derived From:** Magnesium Citrate, Ferrous Citrate, and Manganese Citrate.
