TURF AND ORNAMENTAL PLANT PROTECTION MADE EASIER

Protecting Tomorrow, Today (PTT) is the vision of Bayer. It defines our contribution to sustainability and is the driving principle behind our strategic, operational and cultural activities. We are proud of our industry's role in sustainability. We are committed to developing products that deliver superior results in balance with consideration for our environment.

THE NEW ARMADA® 50 WDG:
NEW FORMULATION. SAME EXPECTATION.

The fungicide you’ve come to trust for contact and systemic protection of both turf and ornamentals is now available in a new water dispersible granule. Armada’s quick dissolving granules provide easy measurement for efficient loading of both backpack and large tank applicators. Armada 50 WDG delivers an effective, easy-to-store granule that saves you time and energy.

TURF’S PROTECTOR AGAINST DISEASE.

Armada’s new formulation still has the same effectiveness you’ve relied on in the past. With the new rate range from 0.6 oz. to 1.5 oz./1000 sq. ft., you can adjust the rate to fit your needs.

The broad-spectrum of disease control offers protection against 16 of the toughest turf diseases, including dollar spot and brown patch with a residual of 21 to 28 days. Armada can be safely applied to all turf types, so you’ll get long, dependable control that will fit all of your customers.

TURF DISEASES CONTROLLED:

- Dollar Spot
- Brown Patch
- Anthracnose
- Leaf Spot
- Gray Leaf Spot
- Summer Patch
- Rapid Blight
- Pink Patch
- Southern Blight
- Fusarium Patch
- Red Thread
- Rust
- Stripe Smut
- Pink Snow Mold
- Large Patch
- Fairy Ring
- Take-All Patch

ARMADA® 50 WDG HAS YOUR
ORNAMENTALS COVERED.

With Armada, you’re assured of great performance on both turf and ornamental plants, which reduces the need for an extensive inventory — saving you money. When applied to ornamentals, Armada 50 WDG delivers healthier landscapes with its broad-spectrum reach and systemic disease protection. And its unique dual-mode of action allows you to handle the toughest ornamental diseases out there.

ORNAMENTAL DISEASES CONTROLLED:

- Anthracnose
- Black Spot
- Downy Mildew
- Leaf Spot
- Powdery Mildew
- Rust
- Scab
- Stem and Cone Rusts
- Tip Blight
- Lophodermium Needlecast
- Pine Rust

ENHANCE PLANT HEALTH.

For enhanced leaf greenness and turf density, sod producers can apply Armada 50 WDG to warm season turf varieties such as Bermuda grass, St. Augustine, and centipede. When applied prior to harvesting and transporting, Armada treated sod will show enhanced performance under shade conditions.

APPLICATION:

Apply Armada 50 WDG at 1.2 – 1.5 oz./1,000 sq./ft. 15 – 30 days prior to harvesting of sod for plant health benefits.
