

Fact Sheet.

OVERVIEW:

- Specticle 20 WP is a **NEW** pre-emergent herbicide for warm season turf that provides exceptional residual control that lasts even under the most difficult conditions
- Specticle offers superior control of a wide range of more than 90 grasses, broadleaf weeds and annual sedges
- Specticle has five use rates between 2.5 and 5.0 ounces per acre, allowing you flexibility to choose the rate that works best for you depending on the weeds to be controlled and the length of control desired
- Specticle has the lowest use rate, up to 40 times less active ingredient than any other pre-emergent herbicide available in the market
- Specticle is powered by the active ingredient Indaziflam, a cellulose-biosynthesis inhibitor (CBI), the most powerful herbicide in this class of chemistry discovered to date
- Specticle is formulated as a 20 percent wettable powder available in easy-to-use, pre-measured water soluble packets of 2.5 and .625 ounces

PRODUCT STRENGTHS:

- Specticle delivers exceptional residual meaning fewer applications; resulting in less labor, selective post-emergent herbicide, and fuel savings
- Specticle provides turf managers with a new mode of action tool to help manage weed resistance
- Specticle is available in an applicator friendly formulation that will not stain or leave any odor behind after application
- Specticle may be combined with many post-emergent herbicides to control existing weeds and provide up to 3-8 months of pre-emergent protection against some of the most difficult to control weeds, including:

Broadleaf Weeds

- Carpetweed
- Chickweed, Common
- Cutleaf Evening Primrose
- Doveweed
- Eclipta
- Florida Pusley
- Henbit
- Horseweed/Marestail
- Lawn Burweed
- Prostrate Knotweed
- Prostrate Spurge
- Woodsorrel, Yellow

Grassy Weeds/Annual Sedges

- Annual Bluegrass, *Poa annua*
- Annual Nutsedge
- Crabgrass, Large
- Crabgrass, Hairy
- Crabgrass, Smooth
- Goosegrass
- Green Kyllinga
- Tufted Lovegrass
- Rice Flatsedge
