

2021 Harrell's® Seed Guide

COASTAL PLAINS AND SOUTHEAST

HARRELL'S® PREMIUM RYEGRASS (50 LBS)

Perennial Ryegrass Blend

ITEM # 620050-P

HARRELL'S® PREMIUM perennial ryegrass blend incorporates the latest technologies and advancements in perennial ryegrass breeding and research from Pure-Seed Testing, Inc.

PERFORMANCE

HARRELL'S® PREMIUM has been designed to answer their needs—rapid establishment, incredible wear tolerance, fast recovery, and superb turf quality are just a few attributes that make it ideal for professional use.

These characteristics consist of superior disease resistance including: outstanding gray leaf spot resistance, brown patch, red thread, and rust pressure. HARRELL'S® PREMIUM also contains heat & drought tolerance, salt tolerance, and excellent wear and traffic performance.

PRODUCT FEATURES

- Excellent dark green color, quick to germinate and establish
- Clean mowing throughout the growing season
- Can be mowed as closely as 1/2"
- New Seedings 300-450 lbs.
- Overseeding of existing turf 250-450 lbs.

HARRELL'S® MAX POA TRIV (50 LBS)

Poa trivialis

ITEM # 620018

Demonstrates very good overall disease resistance, including good resistance to dollar spot and leaf spot

- Tolerates lower light intensity
- Winter hardy with excellent color retention

HARRELL'S® MATRIX TALL FESCUE (50 LBS)

Turf Type Tall Fescue Blend

ITEM # 830285-P

HARRELL'S® MATRIX is the newest technology in tall fescue developed by Pure-Seed Testing (Rolesville, NC & Canby, OR). HARRELL'S® MATRIX'S self-repairing system contains the best and most resilient tall fescue cultivars ever developed by PST.

PERFORMANCE

HARRELL'S® MATRIX has extensive recovery from drought and significant water reducing capabilities. Qualified by the Turfgrass Water Conservation Alliance, the components of HARRELL'S® MATRIX have gone through the most rigorous drought tolerant testing to ensure the highest standards for tolerance on the market. Careful attention towards disease resistance, particularly brown

patch has been a key part of the selection process. Heat and drought tolerance have also played key roles in selecting the strongest varieties to offer in this elite blend. HARRELL'S® MATRIX has the added advantage of being endophyte enhanced to offer value-added protection against other pests and disease.

PRODUCT FEATURES

- Improved fine texture and wear tolerance
- Good brown patch resistance
- Heat and drought tolerant once established
- New Seedings 350-450 lbs.
- Overseeding of existing turf 300-450 lbs.
