# Fairy Ring Golf Performance Support Program

**“We are so sure that BASF’s Fairy Ring Program will be successful, we are putting our confidence into Writing. Rest Easy with our Performance Support Program”**

# What is included in the BASF Performance Support Program?

- 6 months of protection when following the approved program by region
  - ▶ Program is a preventative program only
- If the program is followed, the course has less than 90% control of the total treated area, BASF will provide a curative application for said areas at no cost to the golf course to be supplied by BASF directly. No labor cost is covered.
- Coverage includes any species of turfgrass on golf courses that adhere to BASF product labeling

## Cool Season

### GREENS

#### First Application – Spring

Xzemplar (0.26 oz)

or

Maxtima (0.8 oz)

#### Second Application - Memorial

Lexicon Intrinsic (0.47 oz)

or

Navicon Intrinsic (0.85 oz)

#### Third Application – 4<sup>th</sup> of July

Maxtima (0.8 oz)

or

Xzemplar (0.26 oz)

#### Fourth Application – Mid-Aug

Navicon Intrinsic (0.85 oz)

or

Lexicon Intrinsic (0.47 oz)

- Make 1<sup>st</sup> application at 55-60F average soil temperature
- Rates per 1000ft<sup>2</sup>
- Application spray volume is 2-4 gallons/1000ft<sup>2</sup>
- Provide ¼" irrigation post application
- Applications to be made in conjunction with a soil wetting agent program

## FAIRWAYS

### BASF Recommendation

Make 1<sup>st</sup> application at 55-60F average soil temperature

Apply at 2-4 gallons/1000ft<sup>2</sup>

Provide ¼" irrigation after application

Rates per 1000ft<sup>2</sup>

### First Application

Honor Intrinsic (0.84 oz)

or

Insignia Intrinsic (0.7 oz)

or

Navicon Intrinsic (0.85 oz)

### 28 days after 1<sup>st</sup> Application

Maxtima (0.8 oz)

or

Xzemplar (.26 oz)

### 28 days after 2<sup>nd</sup> Application

Honor Intrinsic (0.84 oz)

or

Insignia Intrinsic (0.7 oz)

or

Navicon Intrinsic (0.85 oz)

Applications to be made in conjunction with a soil wetting agent program
